

*Fig. 1*

Fig. 1 is a perspective view of a rectangular box 20 with a rectangular opening 22 in its front face. A rectangular component 24 is mounted within the opening 22. Component 24 has two circular features 26 on its front face, each with a central pin 28. Below the box, a detailed view of a rectangular component 10 is shown. Component 10 has a textured surface 12 and two circular features 16 on its front face, each with a central pin 18. A dashed line 14 indicates a vertical slot or channel on the front face of component 10. A dashed line 19 indicates a horizontal slot or channel on the top surface of component 10. Lines connect the circular features 26 of component 24 to the circular features 16 of component 10, suggesting they are part of the same assembly or mechanism.
